Summary

IT professional with an M.S. in Information Systems, about 2.5 years of systems development and integration experience, and hands-on projects in Linux and Windows administration, automation, cloud and DevOps, monitoring, SAP, security, and machine learning. Work is published at github.com/OK-22.

Education

Central Michigan University Aug. 2024 - May 2026
Master of Science in Information Systems, GPA 3.64 *Mount Pleasant, MI*
Babcock University Sep. 2019 - Jul. 2023
Bachelor of Science in Computer Science, GPA 3.72

Experience

Integration Analyst, Systems Developer Technical Consultant Jan. 2022 - Jul. 2024
Metrosoft Ltd

- Built Python/SQL backend services and REST APIs for 5+ production clients, integrating 10+ third-party systems with retry logic and input validation
- Resolved issues across 5+ client environments through root-cause analysis and documented fixes
- Cut application response times 30% across 3 product lines by optimizing MySQL queries and service workflows
- Authored 20+ technical documents (API specs, UAT test cases, defect reports, user guides) and supported go-live and upgrade cycles
- Turned requirements from 10+ stakeholders into specifications over 6+ Agile sprints

Selected Projects

- **Homelab** (Ubuntu, Windows Server 2022, Active Directory): two Linux servers, a domain controller, and a joined Windows 10 workstation; key-only SSH, least-privilege sudo, verified delegated password resets, four knowledge-base articles
- **Ansible and Monitoring** (Ansible, Prometheus, Grafana): one playbook configures two servers and a repeat run changed nothing; server-down alert tested with a planned outage, with a runbook and mock postmortem
- **Cloud Pipeline** (Docker, GitHub Actions, Terraform): tests an app, validates Terraform, and publishes a container image; AWS Terraform validated in the pipeline, not deployed
- **Ticket Triage Service** (Python, scikit-learn, FastAPI): classifies help desk tickets and suggests articles; 87.5% on 48 separate hand-written tickets against 99.9% on synthetic training data
- **Process Mining** (Python, PM4Py): simulated 20,000-case purchase-to-pay log with an early-warning rule scored on a holdout (98% recall, 31% precision), plus a design package with five decision records for a production version
- **Automation and Security** (UiPath, Python, nmap): invoice bot that caught 26 of 26 injected errors in 200 invoices; scheduled port-scan alerts through GitHub Actions; black-box penetration test, ten forensics labs, custom ABAP applications

Certifications

IT and Security: Google IT Support Professional Certificate; ISC2 Certified in Cybersecurity (CC); FEMA IS-100.c, IS-200.c, IS-700.b, IS-800.d
SAP and Business: SAP Technology Consultant Professional Certificate; Celonis Process Mining Rising Star; IBM Business Analyst Professional Certificate; ERPsim business simulation, 3rd place
Cloud, AI, and Automation: Oracle OCI, Agentic AI, and Fusion AI Agent Studio Foundations (Associate); UiPath Automation Developer Associate Training; Anthropic Academy AI Fluency

Technical Skills

Systems and Cloud: Ubuntu Server, Windows Server 2022, Active Directory, Ansible, Docker, GitHub Actions, Terraform, AWS (EC2, VPC), Prometheus, Grafana, PowerShell, Bash, Git
Programming and Data: Python, SQL, MySQL, Java, C/C++, JavaScript, ABAP, scikit-learn, pandas, NumPy, FastAPI, Flask, REST APIs, PM4Py
SAP and Automation: SAP ECC (FI/CO, MM, SD), S/4HANA, OO-ABAP, BAPIs, CDS views, OData, BTP and CPI, Celonis, UiPath, Power Automate
Security: Nmap, Wireshark, Metasploit, Burp Suite, Kali Linux, Nessus, Volatility, Autopsy, NIST framework, incident response, TOTP/MFA
Tools and Languages: JIRA, ServiceNow, Microsoft 365, SharePoint, Power BI, Agile/Scrum, UAT; English, Yoruba, Japanese
