Education

Central Michigan University Aug. 2024 - May 2026
Master of Science in Information Systems, GPA 3.64 *Mount Pleasant, MI*

Babcock University Sep. 2019 - Jul. 2023
Bachelor of Science in Computer Science, GPA 3.72

Experience

Integration Analyst, Systems Developer Technical Consultant Jan. 2022 - Jul. 2024
Metrosoft Ltd

- Built Python/SQL backend services and REST APIs for 5+ production clients, integrating 10+ third-party systems with error handling, input validation, and retry logic
- Applied Celonis process mining to surface inefficiencies, built interactive dashboards, and quantified ROI for stakeholders
- Mapped processes and ran gap analysis across 3 product lines to find integration bottlenecks and propose design solutions
- Cut application response times by 30% across 3 product lines by optimizing MySQL queries and service workflows
- Turned requirements from 10+ stakeholders into specifications over 6+ Agile sprints; resolved issues in 5+ client environments through root-cause analysis; wrote 20+ API, UAT, and user documents

Projects

Invoice-to-ERP Automation Bot | *UiPath, Python*

- Built a UiPath workflow that extracts invoice number, PO number, and total from PDFs, validates them against a PO master file, and routes failures to an exceptions queue with a reason code
- Processed 200 synthetic invoices in 4 seconds, catching 26 of 26 injected errors (missing PO, unknown PO, amount mismatch, duplicate) with 0 false positives, checked by a Python scoring script

Purchase-to-Pay Process Mining and Early-Warning Automation | *Python, PM4Py, pandas*

- Measured duration, variants, rework, and bottlenecks on a simulated 20,000-case purchase-to-pay log (92,659 events)
- Designed an early-warning rule (alert when a step exceeds its 90th-percentile wait); on a 30% held-out split it flagged 98% of late cases (31% precision, 3.2x over random) with a median of 67 days of notice

Scheduled Port Scan with Change Alerts | *Python, nmap, GitHub Actions*

- Runs nmap daily through GitHub Actions, compares open ports with a saved baseline, and opens a GitHub issue only for new open ports; validated in a live run, with 6 unit tests before every scan

Advanced ABAP Enterprise Applications | *SAP S/4HANA, ABAP*

- Developed applications with ABAP Workbench, OO-ABAP, Module Pool programming, and BAPIs, including custom GUIs and structured error handling

Additional Projects

- TOTP/MFA authentication system (NIST-aligned); Python/Nmap vulnerability scanner with structured reports; hand-built AWS VPC with a Dockerized Flask app
- Penetration testing and digital forensics labs (Nmap, Metasploit, Volatility, Autopsy); Premier League outcome prediction pipeline (scikit-learn)

Certifications

Automation: UiPath Automation Developer Associate Training (diploma of completion, Oct. 2026)
Process Mining and ERP: Celonis Process Mining Rising Star (Technical and Business tracks); Celonis Generative AI for Business Leaders; SAP Technology Consultant Professional Certificate; IBM Business Analyst Professional Certificate; ERPsim business simulation, 3rd place
Cloud and AI: Oracle OCI Foundations, Agentic AI Foundations, and Fusion AI Agent Studio Foundations (Associate); Anthropic Academy AI Fluency
IT and Security: Google IT Support Professional Certificate; ISC2 Certified in Cybersecurity (CC); FEMA IS-100.c, IS-200.c, IS-700.b, IS-800.d

Technical Skills

Automation and Process: UiPath Studio, Celonis (PQL), process mining, DMAIC and Lean Six Sigma Green Belt, BPMN
SAP: ABAP, OO-ABAP, BAPIs, BADIs, CDS Views, OData, SAP ECC (FI/CO, MM, SD), S/4HANA, SAP CPI, SAP BTP
Languages and Backend: Python, SQL, MySQL, REST APIs, FastAPI, Flask, Java, JavaScript, C/C++, Bash
Tools: Git, GitHub Actions, Docker, AWS, Power BI, JIRA, Nmap, Wireshark; Spoken: English, Yoruba, Japanese
