OLUWAKAYODE BOLUWATIFE RAWA

Indianapolis, IN | (989) 621-1578 | Rawabolu75@gmail.com | linkedin.com/in/oluwakayode-rawa-123635253
Eligible to work in Canada via study/work permit | Open to relocation to Winnipeg, MB

PROFESSIONAL SUMMARY

SAP developer and systems analyst with 2.5 years of professional experience delivering enterprise SAP solutions across ABAP, S/4HANA, SAP BTP, and SAP Fiori. Experienced in full SDLC participation including requirements analysis, solution design, ABAP development, unit testing, and technical documentation. Holds an MSc in Information Systems from Central Michigan University and an SAP Technology Consultant Professional Certificate. Proven ability to collaborate with functional analysts, senior developers, and business stakeholders to deliver clean, maintainable SAP applications aligned with enterprise architecture standards.

TECHNICAL SKILLS

SAP Development: ABAP, OO-ABAP (ABAP Objects), Module Pool/Dynpro, BAPIs, BADIs, CDS Views, OData Services, SAP Fiori/UI5, SAP Screen Personas, SAP BTP, ABAP Development Tools (ADT/Eclipse), SAP RAP framework

SAP Modules: SAP ECC (FI/CO, MM, SD), SAP S/4HANA, SAP BTP, SAP CPI, Enterprise Services, SAP Workflow

Programming Languages: ABAP, Python, SQL, JavaScript, Java, C/C++, Bash, HTML/CSS

Database & Integration: PostgreSQL, MySQL, relational database design, REST APIs, OData services, SAP Enterprise Services

Development Tools: Eclipse/ADT, SAP ABAP Workbench, Git, Docker, Agile/Scrum, SDLC methodologies

Security: NIST Framework, TOTP/MFA, access control, vulnerability assessment, penetration testing

EDUCATION

Master of Science in Information Systems *May 2026*

Central Michigan University, Mount Pleasant, MI | GPA: 3.64/4.0 (Final Semester: 3.90/4.0)

- Specialization: SAP Enterprise Systems, ABAP Programming, Cybersecurity Analysis, Database Management, Systems Analysis and Design

Bachelor of Science in Computer Science *2023*

Babcock University, Nigeria | GPA: 3.72/4.0

- Relevant coursework: Algorithms and Data Structures, OOP (Java, C++), Operating Systems, Database Systems, Computer Security, Software Engineering

PROFESSIONAL EXPERIENCE

Integration Analyst, Systems Developer and Technical Consultant | *Metrosoft Ltd.* *January 2022 – July 2024*

Nigeria (On-site)

- Designed and developed custom Python and SQL backend applications and REST API integrations across 5+ integration points, applying OOP principles, error handling, and retry logic aligned with SAP enterprise services patterns.
- Programmed and maintained ABAP-aligned application logic for enterprise data processing workflows, including structured SELECT/LOOP/READ operations, input validation, and performance-optimized database access patterns.
- Conducted requirements analysis with 10+ business stakeholders across 6+ Agile sprint cycles, translating business processes into technical specifications, design documents, and effort estimates mirroring SAP SDLC practices.
- Performed root-cause analysis and implemented corrective changes across 5+ client application environments, producing structured troubleshooting documentation and defect reports aligned with SAP application support workflows.

- Designed and implemented a TOTP/MFA enterprise authentication system with encrypted credential storage aligned with NIST SP 800-63B and IAM security standards, demonstrating knowledge of SAP security governance principles.
- Built automated network vulnerability scanning tool using Python and Nmap, generating structured security assessment reports and contributing to clean-core security posture across enterprise environments.
- Authored 20+ technical documentation artifacts including functional specifications, design documents, test plans, defect reports, and user guides; supported change management and go-live activities across multiple delivery cycles.
- Applied Celonis process mining tools to analyze order-to-cash and procurement data pipelines, identifying bottlenecks and producing performance visualizations for business stakeholder review.

TECHNICAL PROJECTS

Advanced ABAP Development — SAP R/3 Enterprise Applications | *ABAP, SAP R/3, OO-ABAP, ADT2024–2025*

- Programmed custom SAP R/3 enterprise applications using ABAP Workbench and Eclipse/ADT: Dynpro/Module Pool GUIs, BAPIs with structured error handling, OO-ABAP class hierarchies with inheritance, and SELECT/LOOP/READ logic across 4 modules.
- Built a Shopping Cart application mirroring SD transactional logic, demonstrating end-to-end ABAP development capability from requirements through deployment within the SAP development environment.

Enterprise Systems Configuration — SAP ECC (FI, MM, SD) | *SAP S/4HANA, SAP ECC, ERPsim 2024–2025*

- Configured and executed integrated business processes across FI, MM, and SD modules in live SAP ECC simulations; evaluated cross-module data flows, OTC workflow impacts, and system integration patterns across 3 core modules.
- Placed 3rd in the ERPsim International Business Simulation, executing real-time procurement, production, and sales decisions in a live SAP ERP environment under the mentorship of Stryker Corporation professionals.

Enterprise MFA Authentication System | *Python, TOTP, NIST SP 800-63B* *2023*

- Implemented TOTP multi-factor authentication with QR code provisioning and encrypted credential storage aligned with NIST authentication guidelines and enterprise IAM security controls, demonstrating knowledge of SAP security and access management principles.

Penetration Testing — Widget Corp (Black Box Assessment) | *Kali Linux, Metasploit, Nmap* *2025*

- Executed full penetration test lifecycle including Nmap reconnaissance, Metasploit exploitation, post-exploitation credential extraction, and CVSS-scored remediation reporting; supporting clean-core security assessment practices.

CERTIFICATIONS AND ACHIEVEMENTS

- SAP Technology Consultant Professional Certificate
- ISC2 Certified in Cybersecurity (CC)
- IBM Business Analyst Professional Certificate (8-course program)
- Google IT Support Professional Certificate
- Celonis Process Mining Rising Star Award — Technical and Business Tracks
- ERPsim International Business Simulation — 3rd Place Finish
